

XIII. WRIST SURGERY COURSE

ALL ABOUT OSTEOARTHRITIS

Course with Double Workshop from 28.03. - 30.3.2019

In cooperation with the Anatomy Institute IRCAD in Strasbourg

Kunstwerk von DxDiane

Dear colleagues,

Osteoarthritis is still a challenging argument in wrist surgery. The multitude of the different small joints offer very different solutions, while prosthesis and other techniques are still concurrent. We will discuss these aspects and see the different techniques in live operations.

For selected participants we will continue with our double workshop on cadavers at the IRCAD in Strasbourg.

The first 40 registered participants will be admitted. The course will deal with either open or arthroscopic surgery. Official language will be English.

We hope to see you in Markgröningen for what is sure to be an exciting and productive symposium.

Best regards,

Prof. Max Haerle
