

Pediatric Hand Surgery is becoming more and more an “ultra specialization” in the field of Hand Surgery. As an unique specialization it requires dedicated congresses in which the few high level specialists from Europe and from all over the world could discuss and compare experience in order to grow up together and to help younger colleagues get passionate to this special subject.

After Hong Kong (2018) and waiting for Rotterdam (2020) and Minneapolis (2021) we propose in Milan a “one day” event.

Pediatric Hand Surgery and Rehabilitation require skilled and trained equip and only advocating to specialists continuous updating and valuable well training of younger surgeons we can offer our Little Patients the better treatments and follow-up.

Waiting for you in the real centre of Milan, with our usual friendship and hospitality

Chiara Novelli & Giorgio Pajardi
