**Dear colleagues,**

the focus of our meeting after 7 years, will again be the SL-Ligament lesions. Many new exciting aspects and techniques came up since then. But still this argument is a very challenge to most of us. We will discuss these aspects and see the different techniques in live operations.

For selected participants we will continue with our double workshop on cadavers at the IRCAD in Strasbourg.

The first 40 registered participants will be admitted. The course will deal with either open or arthroscopic surgery. Official language will be English.

We hope to see you in Markgröningen for what is sure to be an exciting and productive symposium.

Best regards,

Prof. Max Haerle
